FORTIFIED Pond CONDITIONER

ASSIST BACTERIA IN THE NATURAL BIODEGRADING OF ORGANIC BUILD UP.

Treatment for ponds, lakes, dugouts, community reservoirs. Assist bacteria in the natural biodegrading of organic build up. Black smelly water during winter and early spring is usually caused by decaying organic matter entrapped in the dugout/pond, organic matter builds up in dugouts/ponds from algae and weed growth and is also washed in to the dugout /ponds by runoff water. In the fall, after algae and weed growth stops, decaying begins along with other materials such as tree leaves, grass and even manure from birds/livestock. The decaying continues after freeze-up and water is robbed of oxygen. In other words, it becomes septic. Under these conditions, odor is reduced and water turns black. Use **FORTIFIED POND CONDITIONER** to clean up your water for the next season.

FORTIFIED POND CONDITIONER Also instantly removes chlorine and chloramines, making tap water safe for fish. Neutralizes heavy metals. Also, **FORTIFIED POND CONDITIONER** replaces the natural slime coating fish need in times of stress, such as handling, shipping or fighting. Contains Aloe Vera, nature's liquid bandage, to prevent the loss of essential electrolytes and protect damaged tissue against disease-causing organisms. Helps heal torn fins and skin wounds and makes the pond a nice winter home for all the live things in your pond.

APPLICATION RATES

Apply 1 liter of FORTIFIED POND CONDITIONER per 135,000 liters of water. RECOMMENDED RATES FOR SMALL WATER BODIES (UNDER 10,000 LITERS) ADD 1.5 MIL. FOR EACH LITER OF WATER.

Mix 1 to 3 with water and spray or throw into pond or dugout on windward side. In order for **FORTIFIED POND CONDITIONER** to work faster distribute evenly around water body.

Water volume can be determined using the following formula:
pond length in feet x pond width in feet x average depth in feet x 28.31 = total liters .

CAUTION: KEEP OUT OF REACH OF CHILDREN
Do not take internally.

STORAGE AND DISPOSAL

Do not reuse empty container. Triple rinse and offer for recycling or disposal in accordance with local, provincial and federal regulations. Store above 0 oC to prevent freezing.
